

SNT ELI 20 W interior power supply unit

Art. No. 5 8913 000

Technical data

Rated voltage AC	AC 230 / 240 V~
Mains frequency	50/60 Hz
Rated voltage DC	DC 230/240 V
Connected load AC	approx. 0 ... 20 W
Connected load DC	approx. 0 ... 20 W
Secondary voltage	DC 28 V SELV
Protection class	I
Power factor λ	no PFC
Ambient temperature t_a	max. 45 °C
Control inlet	1-10 V interface
Secondary line	max. 15 m
Short-circuit protection	yes
Overload/Temp. protection	yes
Standards	according to DIN EN 61347-2-13, DIN EN 55015, DIN EN 61547
Dimensions	103 x 66 x 30 mm
Use of other control devices	qualification required
Load outputs must not be switched paralely	
System drawing	appendix

- Switched-mode power supply with integrated PWM module
- Switched-mode power supply for operation of LED lamps, but with increased power consumption up to 20 W
- Integrated is a control input on the basis of an 1-10 V interface. By means of this control input a dimming of the load is possible
- A flush-mounted electronic potentiometer with switch 1-10 V (Art. No. 5 1165 010) is connected to the SNT ELI 0-20 W
